Working Prototype Known Problems Report

Product Name: Velo
Team Name: YesYes!
Date: 26th July, 2017

1. A user can velow him/herself. (May not think that this is an error)
2. If you velow a user in the Find Velowers page and then unvelow straight away in the same page, it suddenly takes you to your velowing page.
3. Bike image upload works but the image doesn't show on the bike information.
4. On some computers and emulators, the location change doesn't work.
